Voting System using PHP and MySQL

The **Voting System web application** using **PHP/MySQL** is a project that serves as the **automated voting system** of an **organization** or **school**. This system works like the common manual system of election voting system whereas this system must be populated by the list of the positions, candidates, and voters.

This system can help a certain organization or school to minimize the voting time duration because aside they can provide the voters an online platform to vote, the system will automatically count the votes for each candidate. The system has 2 sides of the user interface which are the administrator and voters' side. The admin user is in charge to populate and manage the data of the system and the voter side which is where the voters will choose their candidate and submit their votes.

Features:

- **Vote preview**
- **Multiple votes**
- **Result tally via Horizontal Bar Chart**
- **Print voting results in PDF**
- **Changeable order of positions to show in the ballot**
- **CRUD voters**
- **CRUD candidates**
- **CRUD positions**

Plugins

- **AdminLTE**
- **TCPDF**
- **Backup**

Installation

1. **Download** the source code (available to subscribers only):
www.mcjim-server.com/download/voting-system.zip
2. **Extract** the downloaded file to your server (localhost) root folder
ex. **www** for WAMP or **htdocs** on XAMMP.
3. **Import** the included **.sql** file located in **db** folder which is the database of the system using **phpMyAdmin**.
4. After a successful import, open the extracted folder and open **conn.php** in both the **includes** folder and in the admin/includes folder.
5. **Edit** the database name in the connection depending on the name of the database you created in importing the included **.sql** file.

How to Use

1. First login as administrator by adding **/admin/** in the **URL** example:
<http://localhost/admin>. You should be redirected to the admin login page.
2. Use this **administrator** credential to login:
 - Username: **admin**
 - Password: **admin**
3. **Add** the important data such as positions, candidates, and voters.
4. **Change** the title of the election by clicking the **Election Title** menu.
5. **Rearrange** the order of positions depending on the desired order to show in the ballot using the **Ballot Position** menu.
6. Note: **Voter IDs** should be distributed appropriately to participating voters to avoid mix-ups.
7. Click **Print** for election results.

Screen Shots

Voters List (Admin)

The screenshot displays the 'Voters List' page in the Voting System Admin interface. The page features a sidebar with navigation options: Dashboard, Voters, Positions, Candidates, Election Title, Ballot Position, and Backup Database. The main content area shows a table with 3 entries. The table has columns for Lastname, Firstname, Photo, Voters ID, and Tools. The entries are: Gudni Akona, Lang Ambot, and Name Voter. Each entry has a checkbox and a 'Tools' button with 'Edit' and 'Delete' options. The page also includes a search bar, a 'Show 10 entries' dropdown, and a 'Previous/Next' pagination control.

Lastname	Firstname	Photo	Voters ID	Tools
Gudni	Akona		☒ kq128myWNQILg	Edit Delete
Lang	Ambot		☒ kqQ0ToZEX\$5afuF	Edit Delete
Name	Voter		☒ qDvmtUhsZw8aT90	Edit Delete

Backup Database (Admin)

The screenshot displays the 'Backup Database' page in the Voting System Admin interface. The page features a sidebar with navigation options: Dashboard, Voters, Positions, Candidates, Election Title, Ballot Position, and Backup Database. The main content area shows a 'BACKUP' section with buttons for 'Backup Database' and 'Restore Database'. Below these buttons is a console window showing the backup process logs. The logs indicate that the backup was successful for the 'admin', 'candidates', 'positions', 'voters', and 'votes' tables, and that the backup file was successfully gzipped.
